Teacher- Student Relationship During Ancient India And It's Requirements In Present Era : A Study

TANMAY KR. SING

Assistant Professor , Dept. of Sanskrit
Egra Sarada Shashi Bhusan College

1. Introduction:

Along with the expansion of Aryan civilization in the far past, a full – fledged literature emerged in India itself , including the full details of ancient Indian civilization and culture, which referred to as is Vedic literature. The word Veda is derived from the verbal root vid: In general it means knowledge. Vedic education rested largely on ‘Sruti’ . It was used as an instrument to enable the individual to rise above and to attain the absolute.

My study is about the importance of Vedic ideals of teacher- student relationship in modern education system. In ancient India system of education were based on the Vedas and therefore it was given the name of Vedic Education system. The education system of Vedic period has unique, characteristics and qualities which were not found in the ancient education system of any other country of the world. The principles of Vedic education have been a source of inspiration to all educational system. Because the infancy of humanity; education was at dormant state, in trying to get food, shelter and safety.

Now a days it has become a big problem for modern institution that how to tackle with the students and how to impart moral values. Because due to indiscipline educational environment has become so venomous. The technology which we can use for improving our knowledge and skills, but we have made it harmful by often using it for entertainment purpose only. Dr. Radhakrishnan said that, “A Civilization is not built of bricks, steel and machinery, it is built with men, their quality and character” So the true aim of education is to develop in the body and in soul all the beauty and all perfection of which they are capable. In this study I want to focus, on the basis of Vedic education the development of moral education can be developed in the current system of education and that only relies on the sweet relationship between teacher and students.
