CONCEPT NOTE:

Human Rights, especially after the Universal Declaration of Human Rights, have come to occupy a pivotal place in international and national policy considerations. However, despite the increased focus on Human Rights, the reality of the day is, “Too much emphasis- Too many violations”. Though there is stringent enforcement of laws, collective efforts by the government, the active participation of media and the Human Rights agencies, the Human Rights scenario world over is posed with various challenges because for a larger section of the society, Human Rights are still an abstract conceived. In this backdrop, the importance of Human Rights Education acquires increased importance; it assumes potential significance in transforming Human Rights issues into reality. This seminar is an endeavour to spread awareness regarding the multi-faceted concept of International Human Rights Laws among the youth, academia and even the common message, as well as to contribute to the global discourse on the way forward for International Human Rights Laws.
