Dear Colleagues/ Friends

Indians were acquainted with the modern science of the World during the British rule in India. In the first stage, giving priority to the economic interest, the colonial rulers applied the modern science. Otherwise they had no intention to introduce the modern science to Indians. Of course the Indians took this opportunity to establish their **“Atmashakti”** and self dignity. The political leaders advanced slowly towards the Path of movement to achieve liberty. Similarly, the Indian Scientists to testify their worth and qualification, they started their new experiments and forming new science institution and organizations. Today’s discussion will explore how India was connected with the scientists of the remote areas, cities and World and how India under British rule was devoted to look for the fundamental structure of science of independent India.

In this context we feel very happy & honour to inform you that Dept. of History of our college is going to organized a one day State Level Seminar on **“Colonial Science of India: Response and Reaction”** dated 27th of March, 2020. So, we earnestly invited you to take an active part in it

Thanking you,

Dr. Kakali Singha, **Dr. Dipak Kumar Tamili**
HOD & Convener, Principal & President
Seminar Organizing Committee
